Chapter 1

Introduction

1.1 Introduction

The main objective of the project is to develop online Banking system for banks. In present system all banking work is done manually. User have to visit bank to Withdrawal or Deposit amount. In present bank system it is also difficult to find account information of account holder. In this bank management system we will automate all the banking process. In our bank management system user can check his balance online and he can also transfer money to other account online. In this Software you can keep record for daily Banking transactions. The main purpose of developing bank management system is to design an application, which could store bank data and provide an interface for retrieving customer related details with 100% accuracy.

1.2 Goals/Objective

1. This bank management system also allow user to add new customer account, delete account and user can also modify existing user account information.
2. Using this system user can also search any individual account in few seconds.
3. Using our bank management system user can also check any translation in any account.
4. Our system also provide security check to reduce fraud.
5. The system will check the user's existence in the database and provide the set of services with respect to the role of the user.

Chapter 2

Details & Components

2.1 What to learn in this Project

1. Complete Project is created with Jswings.
2. Complete MYAQL Database Intergerations with this project.
3. Retrieving , Inserting ,Deletion & Editing of Data from JFrame.
4. Creating the entire DBMS & table creation in Apache MySQL PHP my Admin.
5. Using of Data & Time Library in the module .
6. Switching from one frame to another frame .
7. Login & Register page creation.

2.2 What Technologies used in this Project

1. Programming Language: JAVA.
2. APACHE NETBEANS -13 (IDE: NETBEANS 8.3 can also be used).
3. Library used : MYSQL DRIVER.
4. FRONTEND : JAVA SWINGS .
5. DATABASE : MYSQL.

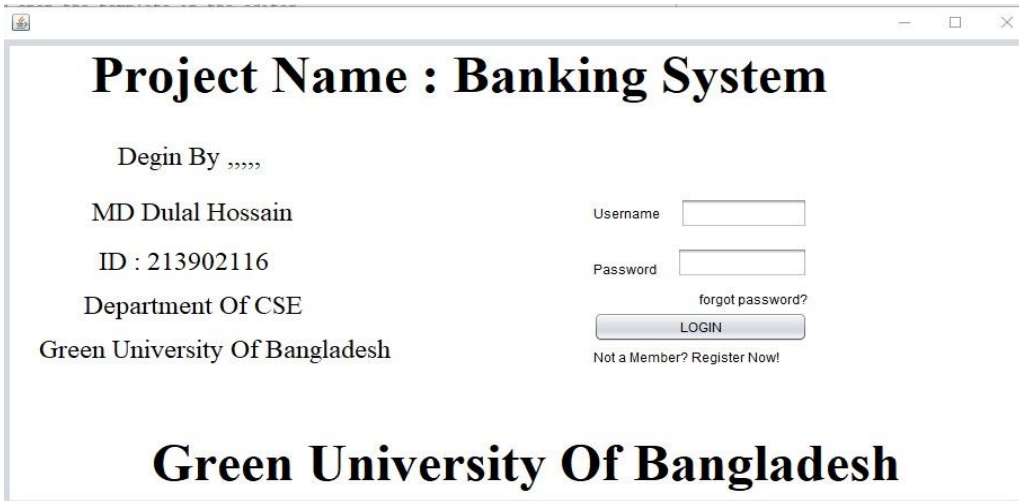

Chapter3

Design / Implementation

3.1 Design

1. Login & Register Page.
2. Account Balance (Check & Recharge).
3. Utility Bill Payment.
4. Instant Payment Transfer.
5. Oder Cheque Book.

3.2 Implementation

Project Name : Banking System

Chapter 4

Performance Evaluation

4.1 Results & Outcomes

The first screenshot shows a 'REGISTER FORM' with the following fields: ID type (Passport Number), Selected ID number (123456789), Account Number (3214566672), Email ID, Registered Phone (111111123111), Date of Birth (21/7/2000), Username (admin), and Password (admin). A 'REGISTER' button is at the bottom.

The second screenshot shows the same form with a 'Selected Message' dialog box overlaying it. The message says: 'Data has been inserted successfully'. An 'OK' button is in the dialog box.

Below the screenshots, a database query result is shown. The query is: `SELECT * FROM `registernow``. The result shows one row of data:

| idtype | idnum | account | email | phone | dob | user | pass |
|-----------------|-----------|------------|-------|--------------|-----------|-------|-------|
| Passport Number | 123456789 | 3214566672 | | 111111123111 | 21/7/2000 | admin | admin |

The query results operations include: Print, Copy to clipboard, Export, Display chart, and Create view.

4.2 Scope of Future Work

1. Create This Project Application launching Play Store & Apple Store.
2. Create a website and give to open source.
3. Adding Online shop in this project.
4. Adding All type of online payment.
5. Avoid manual process and converts it in automatic process

Chapter 5

Conclusion & References

5.1 Conclusion

Bank management system is a virtualization of transactions in banking system. The banking system are used manual working but when we used online banking system it is totally virtualization process which avoid manual process and converts it in automatic process. If user can make a transaction in bank management system it is available in any were also user can link a adhar with account, change branch location easily. Bank management system is saving the time with accuracy than bank manual system.
